

Full Load™

WHAT IT DOES

- Replaces AMS
- Replaces NIS
- Supplies glyphosate's favorite surfactant
- Reduces pH
- Increases glyphosate availability
- Counteracts hard water cations

WHAT IT IS

Water Conditioner and Spray Adjuvant (ASTM) Official Name
 Surfactant + Hard Water Scavenger System + Premium NIS Surfactant Blend

Originally designed and built for most amine salt formulated pesticides

Works really well with glyphosate tank mixtures

Hard Water Scavenger Systems will replace 20 lbs of AMS at the 1 qt per 100 gallons of spray solutions

Works much better than phosphoric acid-based adjuvants

Glyphosate's favorite surfactant

Contains a premium non-ionic surfactant (NIS) blend

Full Load™ can be applied over crops

- XtendiMax approved
- Engenia approved

WITHOUT FULL LOAD™

WITH FULL LOAD™

USE RATES

Full Load™ should be applied between 1 qt (0.25% v/v) to 5 qts (1.25% v/v) per 100 gallons of spray solution. Use higher rates with extremely hard water. Normal use rate is between 1 qt/100 gallons (0.25% v/v) to 2 qts/100 gallons (0.5% v/v)

PACKAGE SIZES:

- 2 x 2.5 gallon jugs
- 30 gallon drums
- 250 gallon totes
