

Oleum PLUS™

WHAT IT DOES

- COCs are good spreaders and provide enhanced coverage over the plant
- This is important for a lot of pesticides, however, penetration of the cuticle is an issue with COCs
- High surfactant COCs have been developed to resolve the penetration issue
- Oleum PLUS™ is the next step with a non-ionic/cationic balanced blend to further increase penetration by combining the spreading effect of oil with the penetration effect of surfactants

WHAT IT IS

High Surfactant Crop Oil Concentrate + Water Conditioner
Oleum PLUS™ is a premium high surfactant loaded crop oil concentrate (COC) formulated with AgraSyst's patented water conditioner system.

A premium COC with a surfactant blend and emulsifiers

Excellent efficacy

Works with multiple chemistries

Oleum PLUS™ can be used with pesticides that call for COCs

Added surfactant gives a performance advantage over other COC adjuvants

Oleum PLUS™ protects pesticides from breaking down or tying up in the spray solution

Care should be taken when applications are made to crops under hot and dry conditions

USE RATES

Post-emergent herbicides: Most labels will call for 1 gallon per 100 gallons of spray solution. However, Oleum PLUS™ is built to work at lower rates than normal COCs

PACKAGE SIZES:

- 2 x 2.5 gallon jugs
- 30 gallon drums
- 250 gallon totes
