SureUp™

WHAT IT DOES

- Increases pH of the spray solution by increasing the solubility of sulfonylurea and sulfonamide herbicides
- Increases pH
- Increases solubility
- Contains a premium blend of surfactants designed to improve the performance of sulfonylurea and sulfonamide herbicides

WHAT IT IS

Surfactant and Water Conditioner (ASTM) Official Name
Premium Surfactant Blend and pH Increaser

Originally built to improve the performance of sulfonylurea herbicides

Completely dissolves sulfonylurea and sulfonamide herbicides increasing the uptake into the plant leaf

Surfactant blend designed to maximize the performance of the herbicide over a broader spectrum of weeds and environmental conditions

SU herbicides that call for MSO as surfactant can be improved by adding 1 qt of Sure Up™ with the MSO per 100 gallons of spray solution

Can be used with tank mixes that contain 2,4-D and dicamba

USE RATES

Sure Up™ should be applied between 1 qt per 100 gallons (0.25% v/v) as per herbicide label to 2 qts (0.5% v/v) per 100 gallons of spray solution.

PACKAGE SIZES: • 2 x 2.5 gallon jugs • 30 gallon drums • 250 gallon totes
